Thermo Scientific 49iQ

Ozone Analyzer—UV Photometric

The Thermo Scientific[™] 49iQ Ozone(O₃) Analyzer utilizes UV Photometric technology to measure the amount of ozone in the air from ppb levels up to 200ppm.

The Thermo Scientific 49iQ Analyzer is a dual cell photometer, the concept adopted by NIST for the national ozone standard. Because the instrument has both sample and reference flowing at the same time, a response time of 20 seconds can be achieved. Dual range, auto range, temperature correction and pressure correction are standard features.
